ABOUT ME

I am a tech enthusiast with a keen interest in programming and cybersecurity.

In the course of my professional journey, I have primarily focused on developing web APIs using .NET Core and Angular-based web applications.

Beyond coding, I enjoy experimenting with gadgets and keeping myself updated on cutting-edge technologies.

My knowledge extends to web application security practices, adding an extra layer of expertise to my skill set.

Employment History

Full Stack Developer, Albar

APR 2023 – PRESENT

- **Credit Score Evaluation System**
 - I had a critical role in a large project that Evaluated customers' credit scores for loan eligibility.
 - Collaborated with multiple companies through Web API and Web Service communication.
 - Handled sensitive information.
- **Project Management Web Application**
 - Independently developed.
 - Utilized by the Dev team for deployment processes.
 - Highly interactive and functional.
- **Smart Form Project**
 - Created a smart form project for efficient form generation.
 - Improved maintainability and accelerated deployment of new forms.
- **Responsive Website Enhancement**
 - Transformed a single-screen-sized website into a responsive one.
 - Enhanced interactivity and wrote a more efficient code base.
- **Legacy Project Maintenance and Microservices Transition**
 - Maintained and recreated legacy projects in a microservices architecture.
 - Fearlessly handled complex tasks and turned the unknown into the known.

Electronic Warfare & Cyber Operator,IL Air Force

OCT 2019 – JUN 2022

- Operated multiple electronic warfare systems, for attack & defence purposes under intense pressure for more than 5000 Operational shift hours.
- Wide knowledge about ECM (Electronic countermeasure) & CRF (Cyber Over RF).
- Led a team as an Instruction Team Leader, and had more than 300 hours of soldier instruction, training & teaching.
- 03 Combatant Status.

Education

Software Development Course, Sela College

JUN 2022 – APR 2023

· Intensive Program of 10 Months that covers the following areas

- Object Oriented Programming using C.
- Data Structures.
- Algorithms and Complexity.
- Javascript,HTML CSS.
- .NET Framework Core, ASP.NET Core MVC , WPF Win-forms.
- Angular.
- React.
- NodeJS.
- Sql.
- Azure.
- Git.

Tihon Hadash Tel-Aviv

2016 – 2019

Courses

The Complete Cyber Security Course : Hackers Exposed! By Nathan House, Udemey

Basic & Advanced Electronic Warfare Courses, IL Air Force

Advanced Soldier Instructing & Training Course, IL Air Force
